Description of the Product

Participation Certificates

This Product (each a "**Participation Certificate**" and collectively the "**Participation Certificates**") allows for participation in the performance of the Reference Portfolio, which is calculated net of relevant costs and fees, as further described below.

Reference Portfolio

The UBS CIO Global Top List Equity Preference Portfolio (EUR) (the "**Reference Portfolio**") is a EUR (the "**Reference Portfolio Currency**") denominated reference portfolio, that intends to replicate the UBS CIO Global Top List Equity Preference List (the "**UBS CIO Equity Preference List**"), as amended from time to time (the "**Target Portfolio**") in accordance with the provisions in the description of the Reference Portfolio (the "**Reference Portfolio Description**") in Annex 1.

The UBS CIO Equity Preference List consists of a list of stocks (each a "**Target Stock Constituent**"). The Reference Portfolio will notionally represent a list of stocks (each a "**Stock Constituent**") and shall be partially FX hedged through the use of FX forwards (each a "**FX Constituent**") (together the "**Constituents**") in a systematic, monthly Currency Hedge, as further described herein.

The Reference Portfolio may also include from time to time a cash position denominated in the Reference Portfolio Currency (the "**Cash Position**"), and together with the Constituents, the "**Reference Portfolio Components**"). The Cash Position will accrue interest at the prevailing reference rate (the "**Reference Rate**"), as described in Annex 1, which may be negative from time to time. Finally, the Cash Position will be negatively impacted by the deduction of certain fees as described under the "Fees" definition in Section 1 ("**Description of the Product**") of this document. For the avoidance of doubt, the Cash Position will not be paid to the investor during the life of the Product.

The performance of the Reference Portfolio will be net of the relevant fees and costs described herein.

The notional value of the Reference Portfolio on the Pricing Date is the Initial Reference Portfolio Level.

Whilst the Reference Portfolio Level and the Redemption Amount is linked to the value of the Reference Portfolio Components, the Issuer may or may not invest the proceeds of the issuance of the Participation Certificates in any Reference Portfolio Component at any time for the purposes of hedging its obligations under this Product. In the event the Issuer elects to invest the proceeds in any Reference Portfolio Component for the purpose of hedging its obligations under this Product, the holders of the Participation Certificates will not have any direct interest or beneficial ownership in any Reference Portfolio Component at any time.

$$\text{Denomination} \times \text{Max}\left(0, \frac{\text{Final Reference Portfolio Level}}{\text{Initial Reference Portfolio Level}}\right)$$

Where:

"**Final Reference Portfolio Level**" means the Reference Portfolio Level as determined by the Calculation Agent on the Expiration Date, the Early Termination Date or the Automatic Early Termination Date (as applicable) and subject to Unwind Disruption, as the sum of:

- i) the unwind proceeds as converted into the Settlement Currency where applicable, using the prevailing currency exchange rate, as determined by the Calculation Agent in its sole and reasonable discretion, that would be realized by a notional investor (in the same position as the Issuer) when selling and/or unwinding the prevailing Constituents comprising the Reference Portfolio; and
- ii) the value of the Cash Position minus any accrued but not yet deducted Adjustment Fee and Reference Portfolio Fee.

In the event that a notional investor (in the same position as the Issuer) would be unable to unwind its positions in the Constituents by or on the Expiration Date, the Early Termination Date or the Automatic Early Termination Date, as determined by the Calculation Agent in its sole and reasonable discretion (such event an "**Unwind Disruption**"), the Issuer reserves the right to postpone the Expiration Date, the Early Termination Date or the Automatic Early Termination Date in accordance with the Market Disruption Events provisions below.

Please note that the Redemption Amount may be less than the initially invested capital.

Early Termination by Issuer

The Issuer is entitled to terminate the Participation Certificates early in full subject to the following notice period:

Quarterly, i.e. as of each 31 March, 30 June, 30 September and 31 December of each year (the "**Early Termination Date**"), subject to at least 30 Business Days prior notice being given to the investors (provided in each case if such day is not a Constituents Business Day, then the immediately following Constituents Business Day shall be the Early Termination Date). The first possible Early Termination Date will be 31 March 2022. There is no early termination right for the investor in the Participation Certificates.

Automatic Early Termination Event and Automatic Early Termination

An Automatic Early Termination Event is deemed to have occurred if the Issuer becomes aware that the Target Portfolio which this Product intends to track has been terminated or withdrawn. The day on or as soon as reasonably practicable following the date on which the Issuer becomes aware of such termination or withdrawal shall be the "**Automatic Early Termination Date**". For the avoidance of doubt, the Automatic Early Termination Date may or may not occur on a Business Day.

Reference Portfolio Level

Except on the Expiration Date, the Early Termination Date or the Automatic Early Termination Date, as applicable, the Calculation Agent shall calculate the Reference Portfolio Level in its sole and reasonable discretion in respect of each week day, subject to a Market Disruption Event (each a "**Reference Portfolio Calculation Date**").

The Reference Portfolio Level in respect of each Reference Portfolio Calculation Date is the sum of (i) the closing price or value of each Constituent on such Reference Portfolio Calculation Date (taking into account the number of units of each Constituent in respect of which the Reference Portfolio has exposure), and (ii) the value of the Cash Position, all of the above as determined by the Calculation Agent in its sole and reasonable discretion.

In respect of the Expiration Date, the Early Termination Date or the Automatic Early Termination Date, as applicable, the Reference Portfolio Level shall be determined by the Calculation Agent in accordance with the provisions under "**Redemption Amount**" above.

Adjustments and Market Disruption

Adjustments to the composition of the Reference Portfolio	If, at any time, an event occurs in relation to a Constituent which the Calculation Agent determines requires an adjustment(s) to be made to the composition of the Reference Portfolio, then the Calculation Agent shall (i) determine which adjustment(s) are to be made to the Constituent with a view to account for the effect of the relevant event and to preserve the prevailing composition of the Reference Portfolio immediately prior to the occurrence of such event and (ii) determine the date on which such adjustment(s) shall take effect.
Market Disruption Events	<p>A Market Disruption Event means, in relation to a Constituent (or an eligible Constituent in respect of a Rebalance only), the occurrence or existence on any calendar day (other than a Saturday or Sunday) or on any number of consecutive calendar days (other than a Saturday or Sunday) any one or more of the following events:</p> <ul style="list-style-type: none"> (i) a limitation, suspension, or disruption of trading in one or more of the Constituents (or component of any Constituent) imposed by the Exchange or the Related Exchange; (ii) the closing or settlement price for any Constituent (or component of any Constituent) is a "limit price", which means that the closing or settlement price for such Constituent for a day has increased or decreased from the previous day's closing price by the maximum amount permitted under applicable rules of the Exchange or the Related Exchange; (iii) failure by the Exchange, the Related Exchange or other price source as applicable to announce or publish the closing or settlement price in respect of any Constituent (or component of any Constituent); (iv) the Exchange or the Related Exchange fails to open for trading during its regular trading session;

- (v) the closure on any Exchange Business Day of any Exchange or Related Exchange in respect of a Constituent (or component of any Constituent), prior to its Scheduled Closing Time;
- (vi) any event (other than an early closure as described above) that disrupts or impairs (as determined by the Calculation Agent) the ability of market participants in general to effect transactions in, or obtain market values for any Constituent (or any eligible Constituent in respect of a Rebalancing only or component thereof);
- (viii) an FX Disruption Event has occurred;

if in the determination of the Issuer or Calculation Agent, any such event is material.

The consequences of a Market Disruption Event are as follows:

- (A) In the event that the Calculation Agent determines that a Constituents Business Day is a Disrupted Day with respect to a Constituent or eligible Constituent, then such Constituent shall not be notionally sold or purchased on the intended effective date of the relevant Rebalancing.
- (B) In the event that the Calculation Agent determines that any Reference Portfolio Calculation Date is a Disrupted Day with respect to any Stock Constituent, then for the purposes of determining the Reference Portfolio Level as at such Reference Portfolio Calculation Date, (a) the price of each Constituent not affected by the occurrence of such Disrupted Day shall be the closing price of such Constituent on the relevant Exchange or Related Exchange and (b) the price of each Constituent affected by the occurrence of such Disrupted Day shall be determined by the Calculation Agent as its good faith estimate of the fair market value (which may be zero) of such Constituent as of such Reference Portfolio Calculation Date.
- (C) If the Calculation Agent determines that the date scheduled to be the Expiration Date, the Early Termination Date or the Automatic Early Termination Date, as applicable, is a Disrupted Day in respect of any Stock Constituent, such date shall be the Expiration Date, the Early Termination Date or the Automatic Early Termination Date, as applicable, for those Constituents which are not affected by the occurrence of a Disrupted Day while the Expiration Date, the Early Termination Date or the Automatic Early Termination Date, as applicable, for any Constituent that is affected by the occurrence of a Disrupted Day shall be postponed to the following Constituents Business Day with respect to such Constituent. If in respect such Constituent the Disrupted Day is persisting for up to 8 (eight) Constituents Business Days immediately following the date scheduled to be the Expiration Date, the Early Termination Date or the Automatic Early Termination Date, as applicable, the price of such Constituent shall be determined by the Calculation Agent by reference to its good faith estimate of the value for such Constituent on that eighth Constituents Business Day.
- (D) On the occurrence of an FX Disruption Event, the value of any Constituent not denominated in the Settlement Currency shall be determined by the Calculation Agent in its sole and reasonable discretion and the Calculation Agent shall have the right to adjust the value of the Reference Portfolio to account for such FX Disruption Event.

Disrupted Day

Any day on which the Calculation Agent determines that, in relation to a Constituent or eligible Constituent, a Market Disruption Event has occurred.

FX Disruption Event

Means (i) an event that generally makes it illegal, impossible, impractical or inadvisable to convert 1 (one) unit of the currency in which any non-EUR denominated Constituent is denominated (the "**Denomination Currency**") into the Settlement Currency, or an event that generally makes it impossible to deliver the Settlement Currency from accounts in which they are held to accounts outside of the jurisdiction of the Denomination Currency; or (ii) the general unavailability to exchange the Settlement Currency at a spot rate (applicable to the purchase of the Settlement Currency for the Denomination Currency) in any legal currency exchange market in the principal financial

centre for the Denomination Currency, if, in the determination of the Calculation Agent, the occurrence of any such events is material.

Significant Risks for Investors

Investors in this Product should be experienced investors and familiar with both derivative products and the financial markets. Potential investors should understand the risks associated with an investment in the Product and shall only reach an investment decision after careful considerations with their legal, tax, financial and other advisors of (i) the suitability of an investment in the Product in the light of their own particular financial, fiscal and other circumstances (ii) the information set out in this document and (iii) the Underlying(s).

In addition to the market risk with regard to the development of the Underlying, each investor bears the general risk that the financial situation of the Issuer could deteriorate ("**Issuer Risk**"). The Products constitute immediate, unsecured and unsubordinated obligations of the Issuer, which, particularly in case of insolvency of the Issuer, rank *pari passu* with each and all other current and future unsecured and unsubordinated obligations of the Issuer, with the exception of those that have priority due to mandatory statutory provisions. The general assessment of the Issuer's creditworthiness may affect the value of the Products. This assessment generally depends on the ratings assigned to the Issuer or its affiliated companies by rating agencies such as Moody's, Fitch and Standard & Poor's. The Issuer Rating indicated in this document reflects the situation at the time of issuance and may be subject to change. The actual Issuer Rating at any given time can be seen on the Issuer's website (www.ubs.com) under "Investor Relations".

In addition to the risk factors below, further risk factors are set out in the Product Documentation.

Product Specific Risks

Capital Protection (at Expiry)	None
Risk Potential in comparison to a direct investment in the Reference Portfolio	The risk potential is similar to a direct investment in the assets contained in the notional Reference Portfolio.
Issuer Call right	Yes; see Early Termination by Issuer above.
Stop Loss Event	None
Currency Risk	The Reference-Portfolio can invest in and be exposed to Reference-Portfolio Components denominated in currencies other than the Settlement Currency. The resulting currency exchange risks are partially hedged through the Currency Hedge, subject to availability of the appropriate FX forward contracts.
Role of UBS CIO	<p>UBS CIO publishes the Target Portfolio independently from the existence of this Product. The publication of the Target Portfolio, as amended from time to time by UBS CIO, formally constitutes research material and shall not constitute any form of a recommendation or investment advice for investors on behalf of the Reference Portfolio, UBS CIO or the Issuer. UBS CIO assumes no responsibility or liability for the performance of the Reference Portfolio.</p> <p>Furthermore, investors should be aware that UBS CIO may stop publishing the Target Portfolio in its sole and absolute discretion complying with the rules of being an independent research provider and has no duty to provide a reason for the discontinuance of the publication of the Target Portfolio.</p>
Risk of Early Termination of the Products	The Product is linked to term of the publication of the Target Portfolio. Hence, if the Issuer becomes aware that the publication of the Target Portfolio ceases to exist, it will early redeem the Products (see Automatic Early Termination Event and Automatic Early Termination above). The Redemption Amount may be materially less than the initially invested capital, and may be zero in the worst case scenario.
The components of the Reference Portfolio may not be the same as in the publication of the Target Portfolio	The Reference Portfolio aims to track the Target Portfolio. However, there may be instances where a Target Stock Constituent in the Target Portfolio may not be eligible for inclusion in the Reference Portfolio as a Stock Constituent, as determined by the Calculation Agent in its sole discretion, taking into account (but not limited to) the provisions in Annex 1.

Price Source Disruption Event

It may become impossible to obtain one or more Constituent levels during the lifetime of the Product and/or on the Expiration Date, the Early Termination Date or the Automatic Early Termination Date, as applicable, due to one or more of the price sources normally used in the relevant market for the Constituents being unavailable because an unscheduled bank closure is declared on short notice in the relevant country or due to the occurrence of any other disruption (each a "**Price Source Disruption Event**"). The Calculation Agent will determine in its sole and reasonable discretion whether a Price Source Disruption Event has occurred.

A Price Source Disruption Event may lead to (i) a postponement of the Expiration Date, the Early Termination Date or the Automatic Early Termination Date, as applicable, and therefore of the Redemption Amount, (ii) to the use of an alternative source for the relevant Constituent level and/or (iii) to the unilateral determination of the applicable Constituent level by the Calculation Agent.

Such postponement, use of alternative price source and/or determination of the applicable Constituent level by the Calculation Agent may affect, materially or otherwise, the Redemption Amount which the investor will receive.

Extraordinary Termination Risk

The Issuer may terminate and redeem the Product prior to the Expiration Date in accordance with the Product Documentation. In case of such extraordinary termination, the Issuer shall pay to the investors an extraordinary termination amount as determined by the Calculation Agent which is equivalent to the market value of the Product, less any costs. Potential investors should note that the extraordinary termination amount may deviate from and may be considerably below the amount which would be payable pursuant to the final redemption provisions on the date that would have otherwise been the scheduled Redemption Date if such termination did not occur. Investors are not entitled to request any further payments after the termination of the Product.

Risk relating to leverage

Investors should be aware that the inclusion of leverage will amplify gains or losses. Leverage has the effect of increasing the volatility of an investment. Investors should be aware this Product may have a gross exposure (the sum of the exposure of leverage applied to each underlying asset) may be greater than the Denomination of the Product.

Illiquidity risk in secondary market

The Issuer or the Lead Manager, as applicable, intends, under normal market conditions, to provide bid and/or offer prices for this Product on a regular basis. However, the Issuer or the Lead Manager, as applicable, makes no firm commitment to provide liquidity by means of bid and/or offer prices for this Product, and assumes no legal obligation to quote any such prices or with respect to the level or determination of such prices.

Potential investors therefore should not rely on the ability to sell this Product at a specific time or at a specific price. Potential investors should note that prices quoted typically include a spread and therefore may deviate from the market value of the Product. In special market situations, where the Issuer is completely unable to enter into hedging transactions, or where such transactions are very difficult to enter into, the spread between the bid and offer prices in the secondary market may be temporarily expanded, in order to limit the economic risks of the Issuer. Hence, investors might sell at a price considerably lower than the actual price of the Product at the time of its sale. By selling the Product in the secondary market investors may receive less than the capital invested.

In case of a secondary market transaction, there is a possibility that costs, including taxes, related to or in connection with the Product may arise for investors that are not paid by the Issuer or imposed by the Issuer.

Market Disruption risk

Investors are exposed to Market Disruption Events (such as trading disruption, exchange disruption and early closure of the relevant exchange), which could have an impact on the redemption amount through delay in payment, change in value or suspension of trading in the Product in the secondary market.

Where the Issuer is completely unable to enter into hedging transactions, for reasons not related to activities of the Issuer, or when entering into such hedging transactions would lead to a commercially unreasonable result, for reasons not related to activities of the Issuer, as determined in the reasonable discretion of the Issuer or the Lead

Manager, as applicable, the spread between the bid and offer prices in the secondary market may be temporarily expanded, in order to limit the economic risks of the Issuer.

Calculation Agent's discretion

The Calculation Agent has a broad discretionary authority to make various determinations and adjustments under the Products, any of which may have an adverse effect on the value and/or the amounts payable under the Products. Prospective investors should be aware that any determinations made by the Calculation Agent may have an impact on the value and financial return of the Products. Where the Calculation Agent is required to make a determination it may do so without taking into account the interests of the holders of the Product.

Withholding tax

Investors in this Product should note that any payment under this Product may be subject to withholding tax (such as, inter alia, Swiss Withholding Tax, and/or withholding related to FATCA or 871(m) of the US Tax Code). **Any payments due under this Product are net of such tax.**

Regarding 871(m) investors should note that a 30% withholding tax is imposed on certain "dividend equivalents" paid or deemed paid to a non-U.S. holder with respect to a "specified equity-linked instrument" that references one or more dividend-paying U.S. equity securities. The withholding tax can apply even if the instrument does not provide for payments that reference dividends. Treasury regulations provide that the withholding tax applies to all dividend equivalents paid or deemed paid on specified equity-linked instruments that have a delta of one ("delta one specified equity-linked instruments") issued after 2016 and to all dividend equivalents paid or deemed paid on all other specified equity-linked instruments issued after 2020.

The Issuer will treat the Products as specified equity-linked instruments that are subject to withholding on dividend equivalents. The Issuer will withhold 30% in respect of dividend equivalents paid or deemed paid on the Products and will not pay any additional amounts with respect to any such taxes withheld. In respect of any Constituents which are U.S. equity securities, for purposes of determining the amount of a dividend treated as notionally reinvested, such dividend shall be reduced by the 30% withholding tax as referenced under the section "Dividend Treatment" above. The Issuer hereby notifies each holder that for purposes of Section 871(m), the Issuer will withhold in respect of dividend equivalents paid or deemed paid on the Products on the dividend payment date as described in Treasury regulations section 1.1441-2(e)(4) and Revenue Procedure 2017-15 §3.03(B), as applicable. Investors in the Products should consult their own tax advisors regarding the application of the withholding tax to their Products and the availability of any reduction in tax pursuant to an income tax treaty. No assurance can be given that investors in the Products will be able to successfully claim a reduction in tax pursuant to an income tax treaty.

Please refer to the Product Documentation for detailed information. If the Issuer is required to withhold any amount pursuant to Section 871(m) or FATCA of the U.S. Tax Code, the Issuer will not be required to pay additional amounts with respect to the amount so withheld.

Where "Weight" in respect of each Constituent(i) will be calculated by the Calculation Agent in accordance with the below formula: Shares in Portfolio(i) x Price in the Reference Portfolio Currency as of Pricing Date / Reference Portfolio Level as of the Pricing Date.

Price in Local Currency", "FX" and "Price in EUR" represent the levels a notional investor (in the same position as the Issuer) would be able to acquire its positions in the Constituents at or around the Pricing Date (which, for the avoidance of doubt, can be over multiple days), as determined by the Calculation Agent in its sole and reasonable discretion.

The current composition of the Reference Portfolio (including the respective weights) may be requested free of charge at any time from UBS AG, P.O. Box, CH-8098 Zurich (Switzerland), via telephone (+41-(0)44-239 47 03), fax (+41-(0)44-239 69 14) or via e-mail (swiss-prospectus@ubs.com).

Rebalancing

A Rebalancing will be initiated on any Reference Portfolio Implementation Date following the Pricing Date, effective as soon as reasonably practicable, as determined by the Calculation Agent in a commercially reasonable manner, subject to the occurrence of a Market Disruption Event on such Constituents Business Day.

If a Target Portfolio Publication Event occurs and the Calculation Agent initiates a Rebalancing by or on the corresponding Reference Portfolio Implementation Date, but before such Rebalancing has taken effect, a subsequent Target Portfolio Publication Event occurs, then the Calculation Agent, in its reasonable discretion, may either (i) complete the Rebalancing in respect of the first Target Portfolio Publication Event and, after such Rebalancing has taken effect, initiate a Rebalancing in respect of the subsequent Target Portfolio Publication Event immediately thereafter or (ii) discontinue the Rebalancing in respect of the first Target Portfolio Publication Event and, instead, initiate a Rebalancing by the Reference Portfolio Implementation Date corresponding to the subsequent Target Portfolio Publication Event.

As soon as reasonably practicable on or immediately following a Target Portfolio Publication Date, the Calculation Agent will determine the target weight of each Stock Constituent (the "**Target Weight**") that shall form part of the Reference Portfolio following such Rebalancing in its reasonable discretion.

The Calculation Agent will determine the exact number of units in each Stock Constituent based on prevailing market conditions in its reasonable discretion. Such number may deviate from the exact Target Weight.

The Calculation Agent may not rebalance the Reference Portfolio following a Target Portfolio Publication Event in the following circumstances:

- (i) The Calculation Agent determines that a Hedging Disruption Event has occurred in relation to any Stock Constituent. In this paragraph, "**Hedging Disruption Event**" means the determination by the Calculation Agent that it would not be reasonably practicable or it would otherwise be undesirable, for any reason, for a notional Investor wholly or partially to establish, re-establish, substitute or maintain any hedging transaction which in the determination of the Calculation Agent would be necessary or desirable to hedge the obligations of an issuer of securities linked to the performance of the Reference Portfolio (such reasons may include, but are not limited to (i) any material illiquidity in the market for any Stock Constituent, (ii) a change in any applicable law (including, without limitation, any tax law) or the promulgation of, or change in, the interpretation of any court, tribunal or regulatory authority with competent jurisdiction of any applicable law (including any action taken by a taxing authority); or (iii) the general unavailability of market participants who would agree to enter into any such hedging transaction on commercially reasonable terms or at all; and
- (ii) the Calculation Agent determines that it would not be reasonably practicable for a notional Investor in the same position as the Issuer to make purchases and/or sales of Stock Constituent due to compliance, liquidity, unreasonable market impact, regulatory, reporting or reputational constraints, take-over considerations, internal restrictions or lack of internal approval.

Target Weight

In respect of a Rebalancing, the inclusion and Target Weight of each Stock Constituent in the Reference Portfolio will be subject to the following methodology and provisions:

- (i) Subject to the following paragraphs, all the stocks that are rated "Most Preferred" in the Target Portfolio shall form part of long positions in the Reference Portfolio following such Rebalancing.

- (ii) The Calculation Agent shall, in its reasonable discretion, make the following determinations:
- (a) in respect of an onshore stock in India, Saudi Arabia and/or Brazil stock, an equivalent ADR or GDR (as applicable) to be included in the Reference Portfolio instead of the onshore stock;
 - (b) in respect of an onshore Taiwan stock, an equivalent ADR or GDR (as applicable) to be included in the Reference Portfolio instead of the onshore stock if the total exposure to Taiwan in the Target Portfolio is greater than 10%, provided that where the total exposure of the onshore stocks is greater than 10% after replacing with onshore stocks with an equivalent ADR or GDR (as applicable and where possible) the Target Weights of the Reference Portfolio may be adjusted to ensure the total exposure to the onshore stocks is less than or equal to 10%, as determined by the Calculation Agent in its reasonable discretion; and
 - (c) in respect of onshore stocks in the People's Republic of China (excluding Hong Kong, Macau and Taiwan) ("PRC"), an equivalent ADR or GDR (as applicable) to be included in the Reference Portfolio instead of the onshore stock if such stock is not available for trade through the relevant exchange connect schemes between PRC and Hong Kong, provided that any stock listed on the ChiNext market shall not be included in the Reference Portfolio.
 - (d) If no relevant ADR or GDR in respect of an onshore stock India, Saudi Arabia or Brazil stock is available, or in the case of a PRC stock, if an onshore stock is not eligible for trade through the relevant exchange connect schemes between PRC and Hong Kong and no relevant ADR or GDR is available, as determined by the Calculation Agent in its reasonable discretion, such stock shall not be selected as a Reference Portfolio Component.
- (iii) The aggregate exposure of any Stock Constituent(s) denominated in EM Currencies shall not be more than 20% of the total notional exposure of the Product. ("EM Currencies mean TWD, KRW, THB, MYR, PHP, IDR, VND, ZAR, RUB, TRY, MXN, BRL and CNY.) Where the aggregate exposure of Stock Constituents denominated in EM Currencies is still greater than 20% the Target Weights of the Reference Portfolio may be adjusted so that the aggregate exposure of any Stock Constituent(s) denominated in EM Currencies shall be less than or equal to 20%, as determined by the Calculation Agent in its reasonable discretion.
- (iv) Furthermore, any stock rated "Most Preferred" that does not meet the Liquidity Criteria as defined hereafter and as reasonably determined by the Calculation Agent shall not form part of long positions in the Reference Portfolio following such Rebalancing.
- (v) Furthermore, any stock rated "Most Preferred" that does not meet the Market Cap Criteria as defined hereafter and as reasonably determined by the Calculation Agent or is subject to a Disrupted Day as of the Target Portfolio Publication Date shall not form part of long positions in the Reference Portfolio following such Rebalancing.
- (vi) Furthermore, if the Calculation Agent determines that it would not be reasonably practicable for a notional Investor in the same position as the Issuer to make purchases and/or sales of any stock rated "Most Preferred" due to compliance, regulatory, reporting or reputational constraints, take-over considerations, internal restrictions or lack of internal approval, such stock shall not form part of the Reference Portfolio following such Rebalancing.
- (vii) The sub-lists of the UBS CIO Equity Preference List, if applicable, shall be equally weighted (each a "**Sub-list Weight**"), unless otherwise stated by the Target Portfolio. The Target Weight of each Stock Constituent shall be equally weighted (including equally-weighted within each sub-list, if applicable) unless otherwise described or indicated in the Target Portfolio, subject to the provisions above.

For the avoidance of doubt, the Cash Position following a Rebalancing shall be computed by the Calculation Agent in its reasonable discretion as the difference between the Reference Portfolio Level immediately before a Rebalancing is implemented and the market value of the Stock Constituents immediately following such rebalancing, taking into account the relevant Adjustment Fees, if any. The Cash Position can be negative from time to time.

Liquidity Criteria

Means a 30-day average daily volume greater than or equal to USD 15,000,000.00, as determined by the Calculation Agent in its reasonable discretion.

Market Cap Criteria

Means a floating market capitalization greater than or equal to USD 1 billion as determined by the Calculation Agent in its reasonable discretion.

Reference Rate

The Reference Rate is observed on every day and shall be equal the EUR Forward Implied 3 Month Rate (Bloomberg Page: EUR13M Curncy) (a "**Relevant Screen Page**") (a "**Reference Rate Component**") which for the avoidance of doubt may be negative from time to time.

In respect of a positive Cash Position, the Spread shall be 0.00% and in respect of a Negative Cash Position, the Spread shall be 0.30%.

If (i) the Reference Rate is no longer displayed or is discontinued permanently without an official legal successor rate, (ii) a public statement by the administrator of the relevant Reference Rate has been issued that (in circumstances where no successor administrator has been or will be appointed that will continue publication of such Reference Rate) it has ceased publishing such Reference Rate permanently or indefinitely or that it will cease to do so by a specified future date, (iii) a public statement by the supervisor of the administrator of the relevant Reference Rate has been issued that, in the view of such supervisor, such Reference Rate is or will, by a specified future date, be no longer representative of an underlying market or the methodology to calculate such Reference Rate has materially changed; or (iv) the administrator of the relevant Reference Rate fails to obtain or maintain any necessary approvals or registrations, the Issuer is entitled to replace the Relevant Screen Page respective such Reference Rate by another rate (which may include an adjustment spread (which may be positive or negative)), representing, at the reasonable discretion of the Calculation Agent, an economically comparable concept, (the "**Successor Rate**").

The specification of a successor Relevant Screen Page respective such Successor Rate may also result in an adjustment of the Spread.
