<sup>1</sup> Balance sheet information for year ended 31 December 2018 is derived from the Annual Report 2019. During 2020, UBS AG restated its balance sheet and statement of changes in equity as of 1 January 2018 to correct a USD 43 million liability understatement in connection with a legacy Global Wealth Management deferred compensation plan. As a result, Total assets, Total equity and Equity attributable to shareholders for 31 December 2018 was restated and therefore differ from the information disclosed in the Annual Report 2019.

<sup>2</sup> The leverage ratio denominators used for the 2020 return calculation, do not reflect the effects of the temporary exemption that has been granted by FINMA in connection with COVID-19.

<sup>3</sup> Based on the Swiss systemically relevant bank framework as of 1 January 2020.

<sup>4</sup> Within the context of the current COVID-19 pandemic and related measures adopted by governments and regulators, FINMA has permitted banks to temporarily exclude central bank sight deposits from the leverage ratio denominator for the purpose of calculating going concern ratios until 1 January 2021.

<sup>5</sup> Includes invested assets for Global Wealth Management, Asset Management and Personal & Corporate Banking.

The Securityholder will not be entitled to any further payments thereafter.

#### Redemption at maturity

If an Early Redemption Event has not occurred in respect of the Security, on the Maturity Date, the Securityholder is entitled to receive the Redemption Amount, which depends on the performance of the Underlyings and whether or not a so-called Kick In Event has occurred, in each case, determined as of the Valuation Date as follows:

For this purpose, a **"Kick In Event"** shall have occurred, if the Settlement Price of **at least one** Underlying is equal to or lower than the respective Kick In Level.

- (i) If a **Kick In Event has not occurred**, the Securityholder will receive on the Maturity Date the Nominal Amount.
- (ii) If a **Kick In Event has occurred** and the Settlement Price of **all** Underlyings is equal to or higher than the respective Strike Level, the Securityholder will receive on the Maturity Date the Nominal Amount.
- (iii) If a **Kick In Event has occurred** and the Settlement Price of **at least one** Underlying is lower than the respective Strike Level, the Securityholder will receive on the Maturity Date an amount in the Redemption Currency which depends on the Settlement Price of the Underlying with the worst performance. Such amount equals (commercially rounded) the Nominal Amount multiplied by the respective Settlement Price of the Underlying with the worst performance divided by the respective Strike Level.

The Security is currency hedged at maturity, i.e. although the Settlement Price is determined in the respective Underlying Currency, the amounts determined in the respective Underlying Currency will be converted 1:1 into the Redemption Currency (Quanto).

There will be no separate payments with respect to accrued Coupon Amounts when purchasing the Security during its lifetime. Accrued Coupon Amounts will be reflected in the on-going trading price of the Security (Dirty Price).

The Issuer is entitled to terminate the Securities with immediate effect if an (extraordinary) termination event occurs. Examples of (extraordinary) termination events include the discontinuation of the determination/publication of the price of the Underlying or the occurrence of a change in law. In such case, the payable termination amount payable to Securityholders may be significantly lower than the capital invested by Securityholders for purchasing the Securities (including the transaction costs).

#### Relative seniority of the Securities in the Issuer's capital structure in the event of insolvency

The Securities constitute direct, unsecured and unsubordinated obligations of the Issuer, ranking *pari passu* among themselves and with all other present and future unsecured and unsubordinated obligations of the Issuer, other than obligations preferred by mandatory provisions of law.

#### Restrictions on free transferability of the Securities

The Securities are freely transferrable.

#### Where will the Securities be traded?

It is intended that application for listing of the Securities to trading on SEDEX will be made.

#### What are the key risks that are specific to the Securities?

**The Securityholders are exposed to the risk of a bail-in.** In case FINMA as supervisory authority in respect of the Issuer exercises resolution measures against the Issuer and writes down or converts the Securities into common equity of the Issuer, Securityholders would have no further claim against the Issuer under the Securities.

**The Securities are not protected by any statutory or voluntary deposit guarantee scheme.** The Issuer's obligations under the Securities are not protected by any statutory or voluntary deposit protection scheme or compensation scheme. Further, no third party guarantees or commitments have been provided in respect of the Issuer's obligations under the Securities. Accordingly, in the event of insolvency of the Issuer, investors may thus experience **a total loss of their investment in the Securities.**

**Specific risks related to dependence on the Underlying.** The Redemption Amount payable in accordance with the Conditions of the Securities depends on the performance of the Underlyings. If a Kick In Event has occurred and in case the Settlement Price of the Underlying with the worst performance is lower than the respective Strike Level, the Redemption Amount could in case of an unfavourable performance of the Underlying with the worst performance even be equal to zero. **In such case, the Securityholder will suffer a total loss of the invested capital.**

**Specific risks related to the occurrence of an Early Redemption Event.** In case of the occurrence of an Early Redemption Event, all outstanding Securities are automatically terminated and redeemed early. In such case, Securityholders will receive a payment of the Early Redemption Amount, but will not be entitled to request any further payments on the Securities. In particular, Securityholders are not entitled to request payments of any further Coupon Amounts which would have otherwise been due under the Securities in accordance with the Conditions of the Securities during the scheduled term of the Securities.

**Specific risks related to no further participation in the performance of the Underlying following the termination and early redemption of the Securities.** Potential investors should be aware that the Securities may in accordance with the Conditions of the Securities be terminated and redeemed early in a number of circumstances. In case of a termination and early redemption of the Securities prior to the Valuation Date, the Securityholder is entitled to demand the payment of an amount in the Redemption Currency in relation to this termination and early redemption. However, such amount can be considerably below the amount which would be payable at the scheduled end of the term of the Securities and, if it is lower than the invested capital, Securityholders may even suffer **a total loss of the invested capital.**

**Specific risks related to reinvestment.** The Securityholders bear the risk that the cash amount received by the Securityholder following the termination and early redemption of the Securities (if any) can be reinvested for a term comparable with the scheduled term of the Securities only at market conditions which are less favourable than those prevailing at the time of the acquisition of the Securities. As a result, the yield achieved by this reinvestment may be significantly lower than the return expected by the Securityholder with the purchase of the Securities.

**Specific risks related to currency exchange rates.** Potential investors should be aware that the Settlement Price of an Underlying determined on the basis of an Underlying Currency other than the Redemption Currency needs to be converted into the Redemption Currency by using a currency exchange rate fixed at the time of issuance of the Securities (so-called "quanto"-feature). Potential investors should be aware that there may be favourable developments in the value of the Underlying Currency against the Redemption Currency. Therefore, the "quanto"-feature of the Securities may preclude the investors from participating in such favourable developments (i.e., because the fixed currency exchange rate used for the purposes of valuing the Underlying in the Redemption Currency is less favourable than the currency exchange rate prevailing in the market at such time) and, therefore, reduce the value of the Securities.

**Specific risks related to the market price of the Securities.** Potential investors bear the risk that the market price of the Securities may fluctuate during the term of the Securities, including, without limitation, as a result of any changes in the performance of the Underlyings or any changes in the volatility of the Underlyings. Moreover, the value of the Securities may fall even in the event that the price of the Underlyings remain constant or rise slightly. Conversely, the value of the Securities may remain constant or rise slightly even if the price of the Underlyings decrease. Accordingly, Securityholders bear the risk that if they can sell any Securities prior to their due date, the sale proceeds may fall below (including significantly below) the amount of capital initially invested in the Securities and investors would then **lose some or all of the invested capital**.

**Specific risks related to the liquidity of the Securities.** Potential investors bear the risk that there is no liquid market for trading in the Securities. Due to their structured nature and linkage to the Underlying, the Securities would generally have a more limited secondary market than conventional debt securities. This means that they may not be able to sell the Securities at a time of their own choosing. This could, in turn, result in potential investors receiving a lower sale price than they would have received had a liquid market existed.

**Risk of fluctuations in the value of the Underlying.** Securityholders are subject to the risks related to the Underlyings in respect of the Securities, whose performance is subject to fluctuations. Therefore, Securityholders cannot foresee the value of the Securities on a certain day in the future. Likewise, the historical data on an Underlying does not allow for any conclusions to be drawn about the future performance of an Underlying and the Securities. An Underlying may have only a short operating history or may have been in existence only for a short period of time and may deliver results over the longer term that may be lower than originally expected. When the Securities are redeemed, exercised or otherwise disposed of on a certain day, substantial losses in value might occur in comparison to a disposal at a later or earlier point in time. The more volatile an Underlying is, the less predictable the amount to be received by the Securityholders. In case of an unfavourable development of the price of an Underlying, the amount received by the Securityholders may be very low or even be equal to zero.

**Specific risks related to hedging transactions entered into by the Issuer.** If the Issuer enters into hedging transactions in connection with the Securities and such hedging transactions are unwound, this could have an impact on the price of the Underlying and, therefore, on any amounts payable to the Securityholders in respect of the Securities. In such cases, Securityholders could even **suffer a partial loss of the invested capital**.

**Specific risks related to potential conflicts of interest of the Issuer and its affiliates.** The Issuer and its affiliates may have commercial interests that conflict with those of the Securityholders (e.g. as a result of the Issuer's involvement in other transactions or the Issuer's existing business relationship with the issuer of the Underlying) and that may impact the value and/or trading of the Securities. In turn, this could result in Securityholders receiving less when selling any Securities they hold than they would have received but for such conflicts of interest and/or **even suffering a partial loss of the invested capital**.

**Specific risks related to hedging transactions entered into by Securityholders.** Because of the structured nature of the Securities, potential investors bear the risk that they may not be able to fully hedge the risks arising from the Securities. If any of the risks which potential investors have not been able to fully hedge materialise, potential investors could suffer **a loss of some or all of the invested capital**.

## Section D – Key Information on the offer of Securities to the public and/or the admission to trading on a regulated market

### Under which conditions and timetable can I invest in this Security?

It has been agreed that, on or after the respective Issue Date of the Securities, the Manager may purchase Securities and place the Securities for sale in Italy (the "**Public Offer Jurisdictions**") as of the Start of the public offer of the Securities. Thereafter, the selling price will be adjusted on a continuous basis to reflect the prevailing market situation.

The total expenses of the issue and/or offer are not separately identifiable and included in the general operating expenses of the Issuer.

As of 28 April 2021 (the "**Start of the public offer of the Securities**"), the Securities may be purchased from the Manager during normal banking hours. There is no subscription period. The Issue Price per Security is payable on the Initial Payment Date.

### Who is the offeror and/or the person asking for admission to trading?

UBS Europe SE, a public company incorporated under German law and domiciled in Germany (the "**Manager**").

### Why is this Prospectus being produced?

#### Use of proceeds

The Issuer intends to issue and offer the Securities to the public in order to raise funding for general business purposes of the UBS Group.

#### Underwriting agreement(s)

It has been agreed that the Manager shall underwrite the Securities on or after the respective Issue Date by means of an underwriting agreement and shall place them for sale under terms subject to change in the Public Offer Jurisdictions.

#### Most material conflicts of interest

The Issuer and affiliated companies may participate in transactions related to the Securities in some way, for their own account or for account of a client. Such transactions may not serve to benefit the Securityholders and may have a positive or negative effect on the value of the Underlying, and consequently on the value of the Securities. Furthermore, companies affiliated with the Issuer may become counterparties in hedging transactions relating to obligations of the Issuer stemming from the Securities. As a result, conflicts of interest can arise between companies affiliated with the Issuer, as well as between these companies and investors, in relation to obligations regarding the calculation of the price of the Securities and other associated determinations.

Within the context of the offering and sale of the Securities, the Issuer or any of its affiliates may directly or indirectly pay fees in varying amounts to third parties, such as distributors or investment advisors, or receive payment of fees in varying amounts, including those levied in association with the distribution of the Securities, from third parties. Potential investors should be aware that the Issuer may retain fees in part or in full.

L'assicurato non avrà diritto ad ulteriori pagamenti in seguito.

#### Rimborso a scadenza

Se non si è verificato un evento di rimborso anticipato per quanto riguarda il Titolo, alla Data di Scadenza, il Portatore ha il diritto di ricevere l'Importo di Rimborso, che dipende dall'esecuzione del Sottostante e dal fatto che si sia verificato o meno un cosiddetto Kick In Event, in ogni caso, determinato alla Data di Valutazione come segue:

A tale scopo, si deve verificare un "**Evento Kick In**", se il Prezzo di Liquidazione di **almeno un** Sottostante è uguale o inferiore al rispettivo Livello Kick-In

- (i) **Nel caso in cui non si verifichi un Evento Kick-In**, l'investitore ha diritto a ricevere il Valore Nominale.
- (ii) **Nel caso in cui si verifichi un Evento Kick-In** e se il Prezzo di Liquidazione di **tutti** i Sottostanti, è uguale o superiore al Livello di Strike, il Portatore ha diritto a ricevere alla Data di Scadenza il Valore Nominale.
- (iii) **Nel caso in cui si verifichi un Evento Kick-In** e se il Prezzo di Liquidazione di **almeno un** Sottostante, è inferiore al Livello di Strike, il Portatore ha diritto a ricevere alla Data di Scadenza un Importo di Rimborso nella Valuta di Rimborso, il cui ammontare dipende dal Prezzo di Liquidazione del Sottostante. L'Importo di Rimborso è uguale (commercialmente arrotondato) all'Importo Nominale moltiplicato per il Prezzo di Liquidazione del Sottostante divisa per il Strike.

Il Security è coperto in valuta alla scadenza, cioè anche se il Prezzo di Liquidazione è determinato nella Valuta Sottostante, gli importi determinati nella Valuta Sottostante verranno convertiti 1:1 nella Valuta di Rimborso (Quanto).

Non verranno effettuati pagamenti separati in relazione agli interessi maturati (interessi cumulati) se il prodotto viene acquistato nel corso della sua durata. L'interesse maturato si rifletterà sul prezzo di contrattazione in corso del prodotto (Dirty Price).

L'Emittente ha la facoltà di estinguere gli Strumenti Finanziari con effetto immediato al verificarsi di un evento (straordinario) di estinzione. Tra gli esempi di eventi (straordinari) di estinzione si annoverano l'interruzione della determinazione/pubblicazione del prezzo del Sottostante o il verificarsi di una modifica legislativa. In tal caso, l'ammontare dovuto al Portatore degli Strumenti Finanziari alla data di cessazione potrebbe essere nettamente inferiore al capitale investito dal Portatore negli Strumenti Finanziari (comprese le commissioni di negoziazione).

#### **Rango degli Strumenti Finanziari nella struttura del capitale dell'Emittente in caso di insolvenza**

Gli Strumenti Finanziari costituiscono obbligazioni dirette, non garantite e non subordinate dell'Emittente, e avranno il medesimo grado di diritti tra di loro e rispetto a tutte le altre obbligazioni attuali e future non garantite e non subordinate dell'Emittente, diverse dalle obbligazioni privilegiate secondo inderogabili disposizioni di legge.

#### **Restrizioni alla libera negoziabilità degli Strumenti Finanziari**

Gli Strumenti Finanziari sono liberamente negoziabili.

#### **Dove saranno negoziati gli Strumenti Finanziari?**

L'Emittente intende presentare domanda di ammissione alla negoziazione degli Strumenti Finanziari sul sistema SEDEX.

#### **Quali sono i principali rischi specifici degli Strumenti Finanziari?**

**I Portatori degli Strumenti Finanziari sono esposti al rischio di bail-in.** Qualora la FINMA, nelle sue funzioni di autorità di vigilanza dell'Emittente, dovesse esercitare misure di risoluzione nei confronti di quest'ultimo e procedesse alla svalutazione o alla conversione degli Strumenti Finanziari in azioni ordinarie dell'Emittente, il Portatore degli Strumenti Finanziari non potrebbe più far valere nei confronti dell'Emittente i diritti associati agli Strumenti Finanziari.

**Gli Strumenti Finanziari non sono assistiti da alcun sistema di garanzia o tutela dei depositi, obbligatorio o volontario.** Le obbligazioni che sorgono in capo all'Emittente in relazione agli Strumenti Finanziari non sono assistite da alcun sistema di tutela dei depositi, obbligatorio o volontario, né da un sistema di indennizzo. Non sono altresì stati forniti impegni o garanzie di terzi in relazione agli obblighi dell'Emittente riguardanti gli Strumenti Finanziari. Di conseguenza, in caso di insolvenza dell'Emittente, gli investitori sono pertanto esposti al rischio di **perdita totale del loro investimento negli Strumenti Finanziari.**

**Rischi specifici relativi alla dipendenza dal Sottostante.** L'Importo di Rimborso dovuto in base alle Condizioni degli Strumenti Finanziari dipende dalla performance del Sottostante. Se si è verificato un Evento di Kick-In e se il Prezzo di Liquidazione del è inferiore al rispettivo Strike, l'Importo di Rimborso, in caso di performance sfavorevole del Sottostante, potrebbe addirittura essere pari a zero. **In tale ipotesi, il Portatore degli Strumenti Finanziari subirebbe la perdita totale del capitale investito.**

**Rischi specifici relativi al verificarsi di un Evento di Rimborso Anticipato.** Qualora si verifichi un Evento di Rimborso Anticipato, tutti gli Strumenti Finanziari in circolazione scadranno in automatico e saranno rimborsati anticipatamente. In tale ipotesi, il Portatore degli Strumenti Finanziari riceverà il pagamento dell'Importo di Rimborso Anticipato, ma non potrà pretendere il pagamento di ulteriori importi relativi agli Strumenti Finanziari. In particolare, il Portatore degli Strumenti Finanziari non può pretendere il pagamento di ulteriori Importi delle Cedole cui diversamente avrebbe diritto in relazione agli Strumenti Finanziari, in base alle relative Condizioni, nel corso della durata naturale degli Strumenti Finanziari.

**Rischi specifici relativi alla mancata partecipazione alla performance del Sottostante in seguito all'estinzione e al rimborso anticipato degli Strumenti Finanziari.** Si fa presente ai potenziali investitori che, in conformità alle Condizioni, in alcune circostanze gli Strumenti Finanziari possono essere oggetto di estinzione e di rimborso anticipato. In caso di estinzione e rimborso anticipato degli Strumenti

Finanziari prima della Data di Scadenza, il Portatore degli Strumenti Finanziari potrà pretendere il pagamento di un importo nella Valuta di Rimborso in relazione a tale estinzione e rimborso anticipato. Tuttavia, tale importo potrebbe essere significativamente inferiore all'importo che sarebbe dovuto alla scadenza naturale degli Strumenti Finanziari e, se risulterà inferiore al capitale investito, il Portatore potrà addirittura incorrere nella **perdita totale del capitale investito**.

**Rischi specifici relativi al reinvestimento.** Il Portatore è esposto al rischio che l'eventuale liquidità incassata in seguito all'estinzione e al rimborso anticipato degli Strumenti Finanziari possa essere reinvestita per un periodo corrispondente alla durata naturale degli Strumenti Finanziari a condizioni di mercato meno favorevoli rispetto a quelle prevalenti al momento dell'acquisto degli Strumenti Finanziari. Di conseguenza, il tasso di rendimento ottenuto con il reinvestimento potrebbe essere decisamente inferiore al rendimento atteso dal Portatore al momento dell'acquisto degli Strumenti Finanziari. Inoltre, la probabilità di perdere gli importi così reinvestiti può essere decisamente più elevata.

**Rischi specifici relativi ai tassi di cambio.** Si fa presente ai potenziali investitori che il Prezzo di Liquidazione di ciascun Sottostante calcolato sulla base di una Valuta Sottostante diversa dalla Valuta di Rimborso deve essere convertito nella Valuta di Rimborso al tasso di cambio stabilito al momento dell'emissione degli Strumenti Finanziari (la cosiddetta condizione "Quanto"). Si fa presente ai potenziali investitori che il valore della Valuta Sottostante rispetto alla Valuta di Rimborso può variare in modo favorevole. Pertanto, la cosiddetta condizione "Quanto" degli Strumenti Finanziari può impedire all'investitore di partecipare a tali variazioni favorevoli (in quanto il tasso di cambio fisso utilizzato ai fini della valutazione del Sottostante nella Valuta di Rimborso è meno favorevole del tasso di cambio prevalente sul mercato in quel momento) e, di conseguenza, può determinare una riduzione di valore degli Strumenti Finanziari.

**Rischi specifici relativi al prezzo di mercato degli Strumenti Finanziari.** I potenziali investitori sono esposti al rischio di oscillazioni del prezzo di mercato degli Strumenti Finanziari nel corso della vita degli stessi, ivi incluso, in via non limitativa, a seguito di variazioni nella performance del Sottostante o della volatilità del Sottostante. Inoltre, il valore degli Strumenti Finanziari può diminuire anche qualora il prezzo del Sottostante dovesse rimanere costante o aumentare leggermente. Per contro, il valore degli Strumenti Finanziari può rimanere costante o aumentare leggermente anche qualora il prezzo del Sottostante dovesse diminuire. Di conseguenza, il Portatore è esposto al rischio che, qualora dovesse riuscire a vendere gli Strumenti Finanziari prima della rispettiva scadenza, i proventi della vendita potrebbero essere inferiori (anche in misura significativa) all'ammontare del capitale inizialmente investito negli Strumenti Finanziari, e in tal caso l'investitore potrebbe **perdere il capitale investito in parte o nella sua interezza**.

**Rischi specifici relativi alla liquidità degli Strumenti Finanziari.** I potenziali investitori sono esposti al rischio che non vi sia un mercato liquido per la negoziazione degli Strumenti Finanziari. A causa della loro natura strutturata e del loro legame con il Sottostante, gli Strumenti Finanziari possono in genere avere un mercato secondario più limitato rispetto ai titoli di debito di tipo convenzionale. Ciò potrebbe comportare l'impossibilità di vendere gli Strumenti Finanziari nel momento prescelto. Questo, a sua volta, potrebbe far sì che i potenziali investitori ottengano un prezzo di vendita inferiore a quanto avrebbero potuto percepire in presenza di un mercato liquido.

**Rischio di oscillazioni del valore del Sottostante.** Il Portatore degli Strumenti Finanziari è esposto ai rischi relativi al Sottostante in relazione agli Strumenti Finanziari, la cui performance è soggetta a oscillazioni. Pertanto, il Portatore degli Strumenti Finanziari non può prevedere il valore degli Strumenti Finanziari a una certa data futura. Allo stesso modo, i dati storici relativi al Sottostante non consentono di trarre conclusioni sulla futura performance del Sottostante e degli Strumenti Finanziari. Il Sottostante potrebbe avere uno storico operativo limitato o potrebbe esistere solo da un breve periodo di tempo e i suoi risultati nel lungo periodo potrebbero essere inferiori a quanto inizialmente previsto. Al momento del riscatto, dell'esercizio o comunque della cessione degli Strumenti Finanziari a una certa data, potrebbero verificarsi perdite sostanziali di valore rispetto alla cessione effettuata in un momento precedente o successivo. Più il Sottostante è volatile, meno prevedibile sarà l'importo che il Portatore degli Strumenti Finanziari potrà ricevere. In caso di andamento sfavorevole del prezzo del Sottostante, l'**importo ricevuto** dal Portatore degli Strumenti Finanziari **potrebbe essere molto basso o addirittura azzerarsi**.

**Rischi specifici relativi all'estinzione di operazioni di copertura stipulate dall'Emittente.** Se l'Emittente stipula operazioni di copertura in relazione agli Strumenti Finanziari, l'eventuale estinzione di tali operazioni di copertura potrebbe avere un impatto sul prezzo del Sottostante e, pertanto, su eventuali importi spettanti al Portatore in relazione agli Strumenti Finanziari. In tale ipotesi, il Portatore degli Strumenti Finanziari potrebbe anche **subire una perdita parziale del capitale investito**.

**Rischi specifici relativi a potenziali conflitti di interesse dell'Emittente e delle sue società collegate.** L'Emittente e le sue società collegate potrebbero avere interessi commerciali in conflitto con quelli del Portatore (incluso, a titolo esemplificativo, in conseguenza del coinvolgimento dell'Emittente in altre operazioni o della relazione d'affari in essere tra l'Emittente e l'emittente del Sottostante) che potrebbero avere un impatto sul valore e/o sulla negoziazione degli Strumenti Finanziari. A sua volta, ciò potrebbe far sì che il Portatore ottenga dalla vendita degli Strumenti Finanziari in suo possesso un importo inferiore a quanto avrebbe potuto percepire in assenza di tali conflitti di interesse e/o che possa addirittura **subire una perdita parziale del capitale investito**.

**Rischi specifici relativi allo smobilizzo delle operazioni di copertura poste in essere dal Portatore.** A causa della natura strutturata dei Titoli, i potenziali investitori comportano il rischio di non essere in grado di coprire appieno i rischi derivanti dai Titoli. Se uno dei rischi che i potenziali investitori non sono stati in grado di coprire completamente si materializza, i potenziali investitori potrebbero subire una perdita **di parte o di tutto il capitale investito**.

## Sezione D – Informazioni fondamentali sull'offerta pubblica di Strumenti Finanziari e/o l'ammissione alla negoziazione in un mercato regolamentato

**Conflitti di interesse più significativi**

È possibile che l'Emittente e le società collegate partecipino a operazioni connesse agli Strumenti Finanziari nel proprio interesse o nell'interesse di un cliente. Tali operazioni possono non portare alcun vantaggio ai Portatori degli Strumenti Finanziari e possono avere effetti negativi o positivi sul valore del Sottostante e, di conseguenza, sul valore degli Strumenti Finanziari. Inoltre, l'Emittente potrebbe stipulare contratti di copertura dei rischi derivanti dagli Strumenti Finanziari con controparti costituite da società collegate. In tale situazione, potrebbero sorgere dei conflitti di interesse tra queste controparti e tra le controparti e gli investitori in relazione agli obblighi relativi alla determinazione del prezzo degli Strumenti Finanziari e agli altri calcoli associati.

È possibile che, nell'ambito dell'offerta e della vendita degli Strumenti Finanziari, l'Emittente o una delle sue società collegate versino, direttamente o indirettamente, commissioni di importo variabile a favore di terzi, tra cui distributori o consulenti per gli investimenti, oppure percepiscano da terzi, direttamente o indirettamente, commissioni di importo variabile, incluse quelle applicate alla distribuzione degli Strumenti Finanziari. Si rammenta ai potenziali investitori che l'Emittente può trattenere, in tutto o in parte, le commissioni.
